Document No.: E-20-PN	Revision No.: 34	Effective Date: 05/02/2024	
Subject: Diplomas Accredited as Meeting the Educational Requirement for Registration as a Candidate and Professional Engineering Technician			
Compiler: Mrs Nivashnee Naidoo	Approving Officer: Dr Franciska Bothma	Next Review Date: After the next approval meeting.	Page 3 of 19

1. ABBREVIATION TABLE

Qualification	Abbreviation
National Diploma	ND
Diploma in Engineering	Dip Eng
Diploma in Engineering Technology	Dip Eng Tech

2. PURPOSE

The purpose of this document is to provide surety to graduates who are part of cohorts within the valid timeframes as clearly recorded for each of the Diplomas and National Diplomas programmes listed for the different Higher Education Institutions (HEIs), that they have satisfied the **educational requirement** toward registration as Candidate Engineering Technician and Professional Engineering Technician with the Engineering Council of South Africa.

3. NOTES

- i. Accreditation means the formal ECSA recognition awarded to an Engineering Programme offered by a registered HEI through a rigorous cyclical quality assurance procedure that ensures it meets the criteria laid down for the type of programme.
- ii. Accreditation criteria are statements of requirements that must be satisfied by a programme to receive accreditation.
- iii. ECSA conducts four (4) types of Accreditations through a rigorous peer-review and policy-directed process:
 - **REGULAR ACCREDITATION:** An accreditation and institutional visit in alignment with the planned/normal 5-year accreditation cycle for an accredited engineering programme.
 - **PROVISIONAL ACCREDITATION:** an accreditation and institutional visit for a new engineering programme at the mid-point of its implementation after the first cohort of students in the programme has completed 50% of the credits towards the completion of the programme. ECSA recognizes graduates between the year of provisional accreditation and the decision of the first regular accreditation visit.
 - **INTERIM ACCREDITATION:** Accreditation at a time within the regular 5-year accreditation cycle as required by the ECSA Education Committee due to the particular outcomes of a previous accreditation visit.
 - **FINAL ACCREDITATION:** Accreditation of a programme that was given notification of termination of accreditation by the Education Committee after the previous interim accreditation.
- iv. Validity dates for accreditation apply to the year in which the student completes the

CONTROLLED DISCLOSURE

When downloaded for the ECSA Document Management System, this document is uncontrolled and the responsibility rests with the user to ensure that it is inline with the authorized version on the database. If the "original" stamp in red does not appear on each page, this document is uncontrolled.

Document No.: E-20-PN	Revision No.: 34	Effective Date: 05/02/2024	
Subject: Diplomas Accredited as Meeting the Educational Requirement for Registration as a Candidate and Professional Engineering Technician			
Compiler: Mrs Nivashnee Naidoo	Approving Officer: Dr Franciska Bothma	Next Review Date: After the next approval meeting.	Page 4 of 19

programme, that is, the last year in which the student is registered with the HEI, after which graduation follows. Where a programme is being phased out or is discontinued the accreditation period is extended by no more than 24 months to allow for a teach-out phase for students in the programme.

- v. In the case of the Afrikaans language universities, the university's name and degree designation are stated in Afrikaans with the English equivalent in square brackets. The abbreviation is not translated.
- vi. The accredited Diplomas and National Diplomas fulfil only the educational requirement as the first step towards registration as Candidate Engineering Technician and Professional Engineering Technician: further experiential requirements exist.
- vii. **Dublin Accord Recognition:** Engineering programmes listed below have been accredited by ECSA and are recognized as meeting the initial academic requirements for Professional Engineering Technician in South Africa. International recognition of these programmes is provided through the Dublin Accord, which was signed in 2002.

Signatories to the Dublin Accord have undertaken to make every reasonable effort to ensure that the bodies responsible for registering or licensing engineering technicians to practice in its country or territory mutually recognize the substantial academic equivalence of engineering academic programmes accredited by other Accord signatories.

ECSA was a founding signatory to the Dublin Accord and other signatories are under no formal obligation to recognize the graduates of accredited programmes prior to 2002. Individual Accord signatories recognize accredited programmes gained prior to 2002 at their own discretion.

Further details about the Dublin Accord and details of all current signatories with links to all accreditation listing information can be found at: www.ieagreements.org

- viii. The year of the next regular evaluation visit (next general review) is shown against programmes that are currently offered.
- ix. Where providers offer programmes at different sites, the programmes at every site are evaluated separately. In such cases, the site of delivery is shown against each programme.

CONTROLLED DISCLOSURE
